

MOR-71-4-KIT: 4 Post Head-End Rack Installation Instructions

Tools needed:

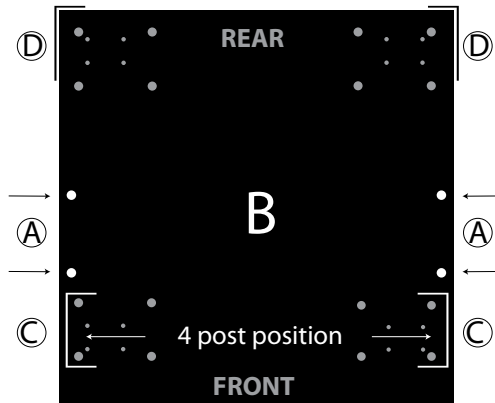

- 7/16" Wrench
- 7/16" Socket

Also included:

- 28 - 7/16" nuts
- 28 - 7/16" bolts

A: (2) Triangular
Mounting Brackets

B: (1) Rack Base

note:

- extra holes are for casters
- the front of the base is opposite from the 2 post rack

E: (1) Top Front Stabilization Bar

F: (2) Top Side Stabilization Bars

G: (1) Top Rear Stabilization Bar

C: (2) Front Rack Posts

D: (2) Rear Rack Posts

1. Insert 4 bolts down through the triangular mounting posts (A) and the rack base (B) with vertical plane facing toward front of base
2. Bolt both front rack posts (C) to the triangular mounting posts (A)
3. Bolt both rear rack posts (D) to rack base (B), 3 bolts total on each side
4. Place top front stabilization bar (E) on top of front rack posts (C)
5. Place top side stabilization bars (F) on the outside of both sides and insert bolts through C, E & F as well as D, E & F and tighten down 4 bolts on each side
6. Place top rear stabilization bar (G) on top rear of rack and insert and tighten down 4 bolts
